Dashboards and analytics set your business apart, empowering growth and success. Key features include:

- Fully configurable to meet individual needs
- Seamless integration with third-party applications
- Flexible deployment options: cloud, hosted, or on-premise

Robust Functionality:

- Customer Focused Project Estimates
- Bid Management
- Subcontractor Breakdown
- Scheduling
- Inventory
- Equipment Management
- Mobile Access
- Field Service
- Accounting
- Human Resources/Payroll
- Customer Relationship Management

BENEFITS:

- **Support Expansion:** Access real-time data anytime, anywhere, and easily add users to adapt to business changes and expand to new locations.

- **Faster Time to Value:** Deploy or upgrade industry-leading processes, templates, and tools in weeks with minimal investment.

- **Lower Total Cost of Ownership:** Eliminate expensive on-site hardware and free up staff for strategic tasks by moving to the cloud.

- **Enhanced Security and Reliability:** Benefit from top-tier data security, 99.9% uptime, and robust protection against millions of attacks.

Designed for construction and engineering businesses, this ERP features:

- Comprehensive suite of CRM
- Sales management
- Project management
- Bid management
- Inventory management
- Enterprise financial management
- Modern, clean, and user-friendly interface
